**Pt. Deendayal Upadhyay Memorial Health Sciences and
Ayush University of Chhattisgarh**

Our Alma Mater, Our Identity, Our Pride of Excellency

The formation of Chhattisgarh as a separate state on 1st November 2000 marked a historic moment for its people. With this, the Government of Chhattisgarh prioritized holistic development, placing strong emphasis on improving the healthcare infrastructure. Several hospitals, clinics, and dispensaries were opened, and qualified doctors and staff were appointed to ensure the delivery of quality healthcare across the state. To meet the growing need for skilled healthcare professionals, the government established new medical colleges. Recognizing the importance of both traditional Indian systems of medicine and the modern medical system—practiced in the state for over 150 years—the government sought to promote and regulate education across all streams of health sciences. This led to the enactment of the **Ayush and Health Sciences University of Chhattisgarh Act, 2008**, by the Chhattisgarh Legislature. Under this Act, the **University was established on 16th September 2008**, and today, it is proudly known as **Pt. Deendayal Upadhyay Memorial Health Sciences and Ayush University of Chhattisgarh**.

The University serves as a teaching, research, and affiliating institution with the purpose of providing systematic education and training in Modern Medicine, Ayurveda, Yoga, Naturopathy, Unani, Siddha, Homoeopathy, Dentistry, Pharmacy, Nursing, Physiotherapy, and Public Health. It governs and affiliates all health science colleges across the state, fostering academic excellence and professional competence. As students and alumni, we hold this esteemed University close to our hearts. It has not only shaped our academic journey but also inspired us to serve society with knowledge, compassion, and integrity. **Our Alma Mater is a symbol of our identity and pride**, and a guiding light for future generations in the noble field of healthcare.

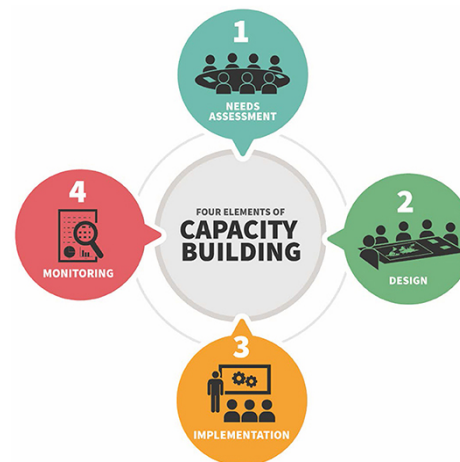

**Empowering Nursing Educators: Competency-Based Training
(Need of the Hour)**

In today's fast-changing healthcare environment, it is very important to empower nursing educators through competency-based education (CBE). Unlike the traditional way of teaching based on time, CBE focuses on helping students learn and perform practical skills. This method ensures that nursing students gain strong knowledge in clinical practices, like giving the right treatment, understanding body functions (pathophysiology), and using medicines safely (pharmacology). It also helps them build important soft skills such as decision-making, teamwork, and treating patients with respect and understanding. CBE prepares nurses to meet real-world challenges and provide safe and effective care to patients.

To achieve this, nursing educators themselves need to keep learning and improving. Training programs, workshops, and new teaching methods can help educators stay updated with the latest healthcare practices. Tools like simulation labs, digital learning platforms, and regular student feedback can make teaching more interactive and useful. When nursing educators are confident, skilled, and motivated, they can better guide their students and improve the quality of nursing education. In turn, this leads to better patient care and a stronger healthcare system overall.

Subject Objectives of the Programme:

- **To understand the principles and framework of competency-based education (CBE)** in the context of nursing and healthcare training.
- **To enhance the pedagogical skills of nursing educators** through modern teaching methodologies and learner-centered approaches.
- **To bridge the gap between theory and clinical practice** by incorporating practical, skill'-based training in nursing education.
- **To equip nursing educators with tools for assessment and evaluation** that aligns with competency-based standards.
- **To promote reflective practice and continuous professional development** among nursing faculty.
- **To foster innovation and adaptability in teaching strategies**, addressing the current and future demands of the healthcare system.
- **To build leadership, communication, and mentorship capabilities** in nursing educators for effective classroom and clinical teaching.
- **To ensure the development of a competent, confident, and compassionate nursing workforce** that meets national and global healthcare standards.

Registration Fee: ₹3000/- (Inclusive food charges and accommodation)

Note: All expenses of the participants will be borne by the college.
